About Me - Muhammad Tanimu

Hello! I'm Muhammad Tanimu, a passionate and creative developer with a strong foundation in HTML, CSS, JavaScript, and PHP. I specialize in building dynamic, responsive, and user-friendly websites and web applications. Whether it's creating smooth animations, crafting clean layouts, or handling backend logic, I take pride in delivering quality results.

I love solving problems and learning new technologies. I'm currently advancing my skills in software engineering, and I've already built projects like login systems, dashboards, e-commerce pages, referral programs, and more.

When I'm not coding, I enjoy exploring new tech trends, collaborating on open-source projects, and pushing my boundaries as a developer.

"The more I learn, the more I can build. The more I build, the more I grow."
